# About Us

---

## Who We Are

Malaysia Debt Ventures Berhad (MDV) was established in 2002 by the Malaysian Government to provide innovative financing facilities to develop the Information and Communications Technology (ICT) sector.

Over the years, MDV has expanded its financing mandate beyond the ICT sector to include other technology-driven sectors and industries identified by the Government as catalysts for the nation's growth, such as Green Technology, Biotechnology, and Strategic and Emerging Technologies. In 2018, MDV further broadened its offering with the launch of its Venture Debt Financing Programme, developed to support high-potential technology start-ups.

## Our Mandate

MDV offers flexible and innovative financing solutions tailored to the unique needs of technology-driven companies, including early-stage businesses with predominantly intangible assets but strong growth potential. Our focus is on empowering companies with disruptive business models that often face challenges accessing conventional financial avenues. To enhance the success potential of the companies we support, MDV leverages a range of debt-based financing instruments designed to meet specific business requirements.

## What we offer

---

MDV is a technology financier that offers flexible and innovative financing solutions tailored to the diverse funding needs of high-potential technology companies and projects.
